[Instagram](#)

I am a highly motivated and hard working designer with a love of all things digital, looking to secure a new role where I can continue to expand my skills and meet new challenges.

CURRENT ROLE

August 2014 - Present **Front-end web developer** PMGroup

Key responsibilities include developing and maintaining new sites for clients. Projects have included building [Patients Association](#) a new website in WordPress, project managing the build of two new job sites for [BSEE](#) and [PharmaTimes](#) and, most recently, designing and building a new series of news sites for Hayward Medical using a Bootstrap framework. I also deal with technical problems that occur on our own [website](#).

PREVIOUS EXPERIENCE

August 2012 - August 2014 **Digital Production** PMGroup

My main duties were to assist the web design team in all their digital projects from creating HTML emails, helping clients create [PMHub](#) profiles to building and maintaining the [Awards](#) pages.

May 2011 - present **Freelance Web designer**

I started creating websites in my spare time as a way of developing my skills as a designer. This has mainly consisted of creating portfolio websites. I recently finished making a responsive site for the artists [Boyd & Evans](#) and am now working on a new design for Proaktiv Architecture.

April 2012 - June 2012 **Digital Design Internship** Crab Creative

My main projects during this internship were working on the [Haribo Jubilee](#) microsite and Nature Valley Olympics project. This involved me creating a digital portrait of the Queen out of Haribo and creating a [PDF](#) of games ideas for the Nature Valley website.

2010 - 2012 **Photographer** jane v bentley photography

Key projects during my time as a freelance photographer were creating a photographic wallpaper for a Barratt Homes gym and taking portraits of families. The family portraits also included personalised [children's portraits](#) that mixed photography and drawing to transform the children into their favourite characters.

February 2011 - May 2011 **Gallery Internship** Flowers Gallery

Apart from the day to day duties of working as the front of house at the gallery I also updated their website and set up a blog for Boyd & Evans so they could document their trip across America.
